METALS AND MATERIALS INDEX JAN-DEC 1977

METALLURGY AND METALS SCIENCE

Prof. M.F. Ashby *Mapping fracture mechanisms* February 46

Dr W.E. Duckworth *The Uri Geller effect* October 51

J. Exon *Metallurgical problems in bridge building* May 44

Sir J. Menter *Adventures in industrial science and technology* October 49

A.H. Mortimer interviewed: *Support for Davignon Plan reflects BISPA goal of market stability* December 40

Prof J. Nutting *Metals as Materials: 1977 Presidential Address* July/August 30

Dr D. Oliver *Technology transfer* February 49

Dr T.C. Rollason *Gravity die-casting of water fittings* January 45

Dr F. Stills *Process Modelling in the physical treatment of metals* January 43

London Metal Exchange celebrates a century of trading March 37

Conference report *Acoustic emission and microstructural damage* March 48

Conference report *Crack propagation in composites* March 49

Conference report *Powder Metallurgy conference looks to efficient use of resources* February 35

Conference report *Hot roll cooling and lubrication* February 47

IRON AND STEEL PRODUCTION

M.P. Bates & W.R. Harrison *Blast furnace practice: Britain v Japan* October 20

Elizabeth Collins 1977 *Queen's Awards recognise the contribution of Britain's metal producers* June 39

R.J. Dowsing *Relining a blast furnace: 2 years of planning: 29 days to complete* April 43

R.J. Dowsing *Shepcote 2 expansion widens BSC's market for stainless steel plate* June 20

R.J. Dowsing *Special billets for the '80s is keynote of new BSC campaign* October 32

R.K. Evans *Britain's private-sector steelmakers emphasise quality and product diversity* November 32 December 36

R.K. Evans *BSC: global steel problems in microcosm* December 19

Dr F. Fitzgerald *Current developments in iron and steelmaking* May 46

H. Hoole *New 3.6m plate mill expands output for Rautaruukki* February 31

Conference report *Continuous casting moves into quality steels* July/August 21

NON-FERROUS METAL PRODUCTION

M.H. Davies Interviewed *We must aggressively stimulate new markets for copper* May 35

R.J. Dowsing *Aluminium second only to steel in worldwide engineering use* January 20 February 20

R.J. Dowsing *Nickel: An irreplaceable role for the versatile metal* April 20 May 20

R.J. Dowsing *Spotlight on Tin* September 20 November 20

Dr D.H. Pulling *The recovery of secondary copper — its technology and economics* September 45

FOUNDRY TECHNOLOGY

R.J. Dowsing *£5½m River Don foundry gives BSC 300 tonnes casting capacity* December 20

R.K. Evans *A new image for the foundry* May 19

R.K. Evans *How foundries are re-equipping for the 1980's* September 40

Dr D.J. Flye *Silicon nitride in the foundry* July/August 36

R.A. Hebbert *Holding nodular iron in channel induction furnaces* October 39

M.L. Page *Welding castings: a foundry progress report* January 28

PLANT DESIGN

J.S. Booth *The 4-high reversing mill for strip, sheet and tinplate* November 39

J.W. Nixon *Materials handling in the modern steelworks* May 40

Ceramic-fibre refractories and the 'low thermal mass' furnace April 48, June 29

Conference report *Mechanical and electrical services to the metals industries* December 26

Tempcon exhibitors meet needs of the metals producers April 28

MACHINING PROCESSES

R.K. Evans *Tuning the laser to materials production* November 19

Dr P.J. James *Hot isostatic pressings: an economic route to powder components* November 27

M.L. Page *Hanover Machine-Tool Exhibition* September 50

M.L. Page *Forming v. metalcutting: rival technologies help trim production costs* December 42

Radial friction welding brings new scope to an established technique May 33

The Powdrex Process; a new route to high-grade tool steels September 36

World's largest friction welder speeds drill-pipe production September 33

FINISHING

M.L. Page *Ion surface treatment enhances metallurgical characteristics, widens materials choice* October 27

WELDING AND JOINING

Radial friction welding brings new scope to an established technique May 33

World's largest friction welder speeds drill-pipe production September 33

HEAT TREATMENT

R.K. Evans *Exploiting electric power for melting and heat treatment: Congress on Electro-Heat in Liege* January 32

Cold reduction enhances tube quality and finish March 25

1977 INDEX continued

HEAT CONSERVATION AND RE-CYCLING

R.K. Evans *Balancing energy against metals resources* March 19

R.K. Evans *Time for a commitment to nuclear power* September 19

R.K. Evans *Towards wider exploitation of Electro-Heat* January 19

Conference report *Induction heating of billets: its technology and economics* July/August 27

CORROSION AND PROTECTION

Stress corrosion failure May 44

RESEARCH AND DEVELOPMENT

R.J. Dowsing *Fulmer Research Institute: Helping optimise materials selection* February 41

R.J. Dowsing *Hinxton Hall: how a central research unit serves 130 companies* December 30

R.J. Dowsing *NRDC risk capital awaits claims by UK inventors* March 31

ENGINEERING APPLICATIONS

R.J. Dowsing *Materials to ensure reliability: keynote of Quality by Design exhibition* July/August 38

R.K. Evans *Materials, processing and design criteria for modern aircraft* April 33

R.K. Evans *Offshore Europe 77: Britain's contribution to North Sea Oil* November 46

M.L. Page *Ultrasonics spearhead today's developments in non-destructive testing* March 21

Dr R. Sawle *Applications of superplastic aluminium* March 47

G.P. Smedley *Offshore Installations* January 45

Engineering disasters — the lessons to be learned October 50

MANAGEMENT AND ECONOMICS

J.A. Ashfield *Aspects of industrial insurance and inspection* July/August 45

Elizabeth Collins *Primary metals cartels: few could match the success of OPEC* March 38

Prof I. Dillamore *Steel and Power* July/August 47

R.K. Evans *Global changes in the markets for steel* April 19

R.K. Evans *The genesis of a Council of Engineering?* July/August 19

R.K. Evans *The need for a national materials policy* February 19

Sir K. Joseph and J. Hughes *Profitability and Social Responsibility* September 55

Dr R.B. Nicholson *Resharpening Britain's industrial marketing edge* December 47

A. Odber *British industry must seek new road to economic recovery* March 42

The economics and operation of high-deformation rolling mills May 28

A.H. Mortimer Interviewed: *Support for Davignon Plan reflects BISPA goal of Market stability* December 40

OVERSEAS TOPICS

M.P. Bates & W.R. Harrison *Blast furnace practice: Britain v. Japan* October 20

H. Hoole *New 3.6m plate mill expands output for Rautaruukki* February 31

H.V. Jones *Realism tempers expansion plans for steelmaking in Peru* April 39

M.L. Page *East Germany: emphasis on special steels from highly-automated mills* June 36

B. Trentini *Iron and Steel Research Institutions in France* October 49

Poland's metal industries centre on copper and steel — and look to the West for plant October 44
